**University of Kentucky's
Center for Environmental & Systems Biochemistry
presents a**

Symposium on Cancer and Immuno-Metabolism

Hear and meet researchers who use stable isotope labeling and other approaches to investigate metabolism in many physiological systems – such as immune cells, cancers and brain metabolism.

Poster sessions and exhibitors will offer additional learning and networking opportunities.

Invited Speakers:

- **Jeffrey Albrecht**, MD, University of Minnesota
- **Teresa W-M. Fan**, PhD, University of Kentucky
- **Richard M. Higashi**, PhD, University of Kentucky
- **Daniel W. McVicar**, PhD, National Cancer Institute, Frederick
- **Elizabeth Repasky**, PhD, Roswell Park Cancer Institute
- **Stanislav Rubakhin**, PhD, University of Illinois, Urbana
- **Shankar Subramaniam**, PhD, University of California San Diego
- **Johan Swinnen**, PhD, Katholieke Universiteit Leuven, Belgium

Registration and abstract submission details to follow soon.
