

We are HUMAN – We are hiring

HUMAN – Harmonising and Unifying Blood Metabolomics Analysis Networks – is an MSCA Doctoral Network funded by the European Union in the frame of Horizon Europe. The project aims to combine metabolomics, lipidomics, blood micro sampling, and bioinformatics for human health monitoring. The network consists of 7 beneficiaries in 6 countries and 14 additional associated partners.

In the frame of this project, we have 12 open positions for doctoral candidates. Fitting candidates can find more information and apply at <https://human-dn.eu/doctoral-candidates/>.

We offer a multidisciplinary network, various training courses, international and intersectoral (academia to industry) secondment, and a competitive salary.

More information at <https://human-dn.eu/>
