

## HMT-America Has an Opening in Analysis and Sales

Human Metabolome Technologies of America is looking for someone with a strong scientific background, preferably with metabolomics knowledge and experience, willing to work on our sales and data analysis team. As our clients can testify to, we at HMT pride ourselves on our metabolomics knowledge and how we work closely with our clients to help them get the most out of their data.

This position entails both a sales/marketing element to work on lead generation and the opportunity to work with our clients to help perform statistical and biological analysis. This is a learning position to grow skills in metabolomics, project planning, sales and data analysis.

HMT-A is a growing company, with clients in North America, South America, Great Britain and Europe. As part of our sales and project support team, candidates for this position will work with our Boston office to generate new leads, close deals and analyze data. While sales experience is a plus, we are strongly interested in candidates that have worked with metabolomics and analyzed such data. We have no preference for the specific area of metabolomics support (health care, food, medical, probiotics etc.).

HMT-A is part of HMT, a global metabolomics company celebrating 20 years this July!

Alexander Buko, PhD, is VP of HTM-A and is attending Metabolomics 2023. Email (Below) or call Alex at 617 548 2147 to meet up at the conference. Alex will be here until Thursday morning.
